

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 3, line 19, of the application as originally filed with the following paragraph:

The above object together with numerous other objects, advantages and features, which will become evident from the detailed description below, is obtained according to a first aspect of the invention by a container according to the independent claim 1:[[.]]  
A container wherein the container being adapted to comprise a fluid and at least one contact lens, the container comprises an insert, the insert being made of a mouldable material, such as silicone, rubber or polymer, and the material comprising a predetermined concentration of silver nano particles and/or titanium oxide photocatalyst.

Please replace the paragraph beginning at page 3, line 30, of the application as originally filed with the following paragraph:

The above mentioned object is further obtained according to a second aspect of the invention by an insert according to the independent claim 3:[[.]]  
An insert for a container for cleaning and/or disinfecting contact lenses, the insert being made of a mouldable material, the material comprising a predetermined concentration of silver nano particles and/or titanium oxide photocatalyst.

Please replace the paragraph beginning at page 5, line 1, of the application as originally filed with the following paragraph:

The above mentioned object of the invention is further obtained according to a fourth aspect of the invention by a container according to the independent claim 8: [[.]]  
A container wherein the container being adapted to comprise a fluid and at least one contact lens, the container being made of a mouldable material, and the material comprising a predetermined concentration of silver nano particles and/or titanium oxide photocatalyst.

Please replace the paragraph beginning at page 5, line 16, of the application as originally filed with the following paragraph:

Preferred embodiments according to the invention are stated in the dependent claims as follows: [[.]]

Please add the following seven new paragraphs after the paragraph at page 5, lines 16-17 of the application as originally filed:

A container wherein the silver nano particles have a particle size range of 1 to 100 nm, and/or the concentration of silver is above 0.001% Ag, preferably from 0.002% Ag to 2.0% Ag, most preferably from 0.002% Ag to 0.0099% Ag.

An insert wherein the silver nano particles have a particle size range of 1 to 100 nm, and/or the concentration of silver is above 0.001% Ag, preferably from 0.002% Ag to 2.0% Ag, most preferably from 0.002% Ag to 0.0099% Ag.

A contact lens made of a mouldable material, the material comprising a predetermined concentration of silver nano particles and/or titanium oxide photocatalyst.

A contact lens wherein the silver nano particles have a particle size range of 1 to 100 nm, and/or the concentration of silver is above 0.001% Ag, preferably from 0.002% Ag to 2.0% Ag, most preferably from 0.002% Ag to 0.0099% Ag.

A contact lens for reduction of an amount of bacteria in an infected eye having microbial, vira, achantamoeba or fungal activity.

A container wherein the silver nano particles have a particle size range of 1 to 100 nm, and/or the concentration of silver is above 0.001% Ag, preferably from 0.002% Ag to 2.0% Ag, most preferably from 0.002% Ag to 0.0099% Ag.

Use of silver nano particles and/or titanium oxide photocatalyst for a contact lens, a container or an insert for a container.
